

JEB BUSH, GOVERNOR

RHONDA M. MEDOWS, MD, FAAFP, SECRETARY

Dear Provider:

The Agency for Health Care Administration appreciates your efforts in assisting Medicaid with its cost-control programs. With Prescribers, Pharmacies and Medicaid working in concert, the preferred drug list (PDL) program has proven successful.

In an effort to keep the PDL both clinically and economically sound, the list is dynamic and does change as the landscape of particular therapeutic categories change. For this reason we have provided multiple ways to access the PDL. Enclosed please find our most recent print version of the PDL. The PDL is also updated quarterly on our website two-weeks after each P&T meeting. The online PDL can be accessed by visiting the following web address: http://www.fdhc.state.fl.us/Medicaid/Prescribed_Drug/pharm_thera/fmpdl.shtml . One last resource we have provided to assist you in identifying medications on the PDL is our Therapeutics Consultation Program's help desk, which can be reached by calling 877-553-7481.

We trust you will find this information useful when making therapeutic decisions for your patients. Once again, thank you for making the PDL an effective tool in managing our costs and treating Medicaid recipients.

Sincerely,

George Kitchens
