

JEB BUSH, GOVERNOR

RHONDA M. MEDOWS, MD, FAAFP, SECRETARY

Dear Provider:

The State of Florida Medicaid Program implemented a preferred drug list (PDL) with prior authorization, effective July 2001. The enclosed one-page document is a quick reference for the Florida Medicaid PDL, representing revisions from the Pharmaceutical and Therapeutics Committee meetings.

As you know, the Florida Medicaid Preferred Drug List (PDL) is a listing of prescription products selected by the Pharmaceutical and Therapeutics Committee as efficacious, safe, and cost effective choices when prescribing for Medicaid patients. FDA approved drugs that are not listed are available with prior authorization, by calling the Therapeutic Consultation Program toll-free at (877) 553-7481. If a prescriber cannot readily obtain an authorization, the pharmacist may dispense a 72-hour supply. The pharmacist may also use professional judgment in situations that would necessitate a 72-hour emergency supply.

Drugs on the Florida Negative Formulary, as well as products from drug categories that are exempt by statute, are included on the list to inform clinicians of cost effective choices. However, all antipsychotics, antidepressants, anticonvulsants and HIV related antiretroviral agents are exempt from prior authorization restrictions. Generic drugs with federal or state pricing limits are included on the PDL. Other generic drug products may or may not be included.

This printed version of the PDL will be revised and distributed twice per year. A current listing of the PDL is also available on the Agency's website at http://www.fdhc.state.fl.us/Medicaid/Prescribed_Drug/pharm_thera/pdl.shtml

Sincerely,

A handwritten signature in black ink that reads "George O. Kitchens".

George O. Kitchens, Chief
Medicaid Pharmacy Services

FLORIDA MEDICAID

The Florida Medicaid PDL is a listing of prescription products selected by the Pharmacy and Therapeutics Committee as cost effective choices for clinician consideration when prescribing for Medicaid patients.

The following therapeutic categories are exempt from the Florida Medicaid PDL: mental health medications and HIV-specific antiviral.

Drugs listed on the Florida Negative Formulary and drugs dispensed for a 72-hour emergency supply are also exempt.

The following therapeutic categories are exempt from the four brand per month limit: generic drugs, oral contraceptives, insulin, diabetic supplies, and HIV-specific antiviral.

Medications with asterisk will be dispensed generically.

Over-the-counter drugs are not covered by Florida Medicaid.

The Florida Medicaid PDL is subject to revision following consideration and recommendations by the Pharmacy and Therapeutics Committee and the Agency For Health Care Administration.
