

JEB BUSH, GOVERNOR

RHONDA M. MEDOWS, MD, FAAFP, SECRETARY

Dear Physician or Primary Care Provider:

The Agency for Health Care Administration is implementing a new health care management program to help MediPass recipients with chronic conditions enhance their health care. **Florida: A Healthy State Disease Management Program**, a joint initiative with Pfizer Health Solutions, will better the lives of selected MediPass clients with congestive heart failure, diabetes, asthma, and hypertension by pairing them with care managers who will work with them and their providers to help manage their conditions. You may encounter patients who have been selected for this program, or considered by you to be a good candidate for this program.

The Agency is committed to this very worthwhile program, is eager to inform you further about this important program, and provide you with additional educational materials of interested. For this reason, one of the care managers from an affiliated hospital may sometimes call on you or your staffs to either provide you with information related to this program or verify the contact information for these recipients. The care managers are functioning as extensions of the health care organizations, which have contractual agreements with AHCA to provide care management to these high-risk MediPass populations. Their efforts are recognized and appreciated by the Agency.

Thank you in advance for your cooperation and support. By identifying prospective enrollees and helping to provide proper contact information, you are improving the lives of MediPass beneficiaries in the state of Florida.

Sincerely,

Bob Sharpe
Deputy Secretary for Medicaid
