

Common KePro Error Codes

- 1. Error Code 02:** Invalid beginning date of service
Description/Cause - The "from" date of service on the requested PA is not a suitable date.
- 2. Error Code 04:** Invalid recipient number
Description/Cause - The recipient number on the requested PA is not linked to a recipient in the Medicaid Management and Information System.
- 3. Error Code 05:** Invalid recipient number check digits
Description/Cause - The recipient number on the requested PA is not the correct amount of digits for a Medicaid recipient number.
- 4. Error Code 06:** Recipient not eligible
Description/Cause - The recipient is not eligible for all or a portion of the requested PA effective date. This error sets when the recipient is not eligible for the requested PA date span.
- 5. Error Code 10:** Duplicate PA exists
Description/Cause - A duplicate PA exists for all or a portion of the requested PA effective date. For hospitals, a PA can only overlap one day to support a transfer from one facility to another.
- 6. Error Code 41:** Invalid end date of service
Description/Cause - The "TO" date of service on the requested PA is not a suitable date.
- 7. Error Code 57:** PA not on file
Description/Cause - The PA that is being requested to be updated is not in the Medicaid management and information system.
- 8. Error Code 59:** Recipient not on file
Description/Cause - The recipient on the requested PA is not in the Medicaid Management and Information System.
- 9. Error Code 72:** Error HIPAA date span
Description/Cause - Length of authorized span cannot exceed 120 calendar days.
- 10. Error Code 74:** Error PA in used status
Description/Cause - All of the authorized units or days have been exhausted.
- 11. Error Code 79:** Error units used
Description/Cause - All of the authorized units or days have been exhausted.
